**Subject:** RE: NFB-Proposed Excavation Order

The egress for personnel from revised Stage 1 will need to be on the hotel property. We will need to make the arrangements with property owner to occupy a small portion of the back parking lot area for the personnel decon area. Do we need an access agreement?

-Pete

**Subject:** NFB-Proposed Excavation Order

Good Afternoon:

- Outside Excavation Areas

- o As we all discussed more recently, due to the lab not being in place, we need to revise our order of evacuation. We cannot leave a high traffic visible area open while we wait three weeks for analytical data. It also will be better to work out the kinks with our procedures away from the main thoroughways and buildings.

- o I have attached both the original draft and now a revised draft of the order. I am proposing we excavate the western wooded area first. This will allow us to continue working this tour and will not be as big of a burden to leave awaiting analytical (High Visibility fencing along the perimeter

while we wait?)

- o The instrument should be transported to the Site this tour and we should have the lab up and running for our September tour.
- o Pete, I noticed that front of GNBC and our trailer area were not outlined as eventual excavation area. Please add to image once we revise. Also, we should separate Stage 13 into two stages. The fenced in area where we are currently staging material should be its own area and most likely will be one of the latter areas excavated.
- o Please give me your thoughts

Thanks

Regards,

Eric
